

Caravan Park

Huddled at the base of the Tawallah Range is the beautiful natural, crystal clear, hot thermal spring, bubbling and pushing its way out from underground, cascading thousands of litres of water from this pretty pandanus lined rock hole in the gap of the ranges. Flowing straight through our picturesque campground, this spring is the head waters of the pristine and unspoiled Rosie River, which winds and turns about one hundred kilometres through rugged and spectacular terrain to eventually flow through to the coast of the Gulf of Carpentaria. The camp ground and caravan park extend extensively with the creek meandering along the lush paper bark lined banks. There are acres of green grassy sites and big shady trees, donkey hot showers, flushing toilets, laundry facilities, good drinking water, safe swimming, friendly hosts, air-conditioned cabins, information and a licenced bar and even a bakery with bread baked daily!

Lorella Springs Station Wilderness Park

is a 4,000 square km coastal property in the Gulf of Carpentaria. Situated 275km East of Roper Bar and 180km North West of Borroloola, you will find Lorella Springs by travelling along the Savannah Way through the newly declared Limmen National Park.

With Lorella being so remote, please travel with caution, carrying spares and water. Access is by unsealed dirt road only, so Lorella is best suited to outback-prepared vehicles and caravans.

Lorella Springs Wilderness Park

One million acres of untouched remote Northern Territory coastal wilderness

Lorella Springs

With over 100kms of coastline, river systems and waterways, huge chasms & gorges formed millions of years ago, wetlands and swamps teeming with wildlife, this unique remote Australian outback property offers 4WD driving, bird and animal watching, exploring, swimming in crystal springs, pristine fishing and remote Wilderness Adventures.

It is an ideal getaway!

Bird Watching

As we explore and discover this vast and massive landscape, Lorella opens up letting us know more of her amazing beauties and secrets.

There is such a variety of bird life, all of which is recorded on our Lorella Springs bird list, and every year our bird watching friends keep updating and adding more species.

Private Naturist Camping

Separate and secluded from the rest of the campground, our Nudie camp is for those who are not afraid to bare it all and take it all off!

Fishing

With a spectacular and vast coastline, kilometres of rivers and creeks, Lorella is boiling with life, offering a huge range of fishing opportunities - from the pandanus lined fresh water billabongs through to the Gulf and its tropical off shore reefs, estuaries and creeks, mangroves and rock outcrops, which attract a vast range of reef fish, game fish, crabs, prawns and red claw.

4WD

There are many hundreds of kilometres of tracks throughout Lorella, like veins weaving and winding deeper into the more untouched parts of this huge land. With some helpful directions and maps provided from the homestead office, there are many basic easy tracks for everyone to enjoy, through to the more challenging extreme 4WD tracks where you will be able to put your driving skills to the test and try out your recovery gear.

Scenic Helicopter Flights

Enjoy spectacular escarpment landscape from the skies, through sheer and deep chasms and gorges as well as the spiralling ancient pillars of the breathtaking "Valley of the Mazes" and the popular Lost City rock formations. Or heli-fish estuaries, creeks and some of the most remote untouched coast line in the NT.

Experience the unique "Rosie Track" through to the untamed wilds of the gulf
